

Front-End Developer Job Description

Responsibilities:

- Develop and maintain user-facing features for websites and web applications.
- Write reusable and efficient code using HTML, CSS, and JavaScript.
- Create responsive designs that ensure compatibility across devices and browsers.
- Collaborate with UX/UI designers to bring mockups and wireframes to life.
- Optimize applications for maximum speed and scalability.
- Debug and troubleshoot UI issues and bugs.
- Stay updated with the latest front-end technologies and industry trends.

Skills Required:

- Strong proficiency in HTML, CSS, and JavaScript.
- Experience with modern front-end frameworks like React, Angular, or Vue.js.
- Knowledge of responsive design principles and CSS preprocessors (e.g., SASS, LESS).
- Familiarity with version control systems like Git.
- Understanding of browser developer tools for debugging and performance tuning.
- Experience in building and consuming RESTful APIs.
- Knowledge of accessibility standards (WCAG) and ensuring ADA compliance.
- Strong attention to detail and a passion for delivering high-quality user experiences.

Preferred Skills:

- Familiarity with front-end testing frameworks like Jest or Mocha.
- Experience with build tools such as Webpack, Gulp, or Vite.
- Knowledge of TypeScript for enhanced JavaScript development.
- Understanding of SEO principles for optimizing web applications.
